Contents

Volume 70 Number 1

AUTHORS		ARTICLES
V Linss, T Halm, W Hoyer, F Richter and N Schell	1	Analysis of the biaxial strain state of Al-doped c-BN films using diffraction experiments with synchrotron radiation
D Zhang, S Gong, H Xu and H Guo	11	Measurements of the thermal gradient over EB-PVD thermal barrier coatings
G-r Gu, Z He, Y-c Tao, Y-a Li, J-j Li, H Yin, W-q Li and Y-n Zhao	17	Conductivity of nanometer TiO_2 thin films by magnetron sputtering
H Z Durusoy, Ö Duyar, A Aydınlı and F Ay	21	Influence of substrate temperature and bias voltage on the optical transmittance of TiN films
G Buyle, W De Bosscher, D Depla, K Eufinger, J Haemers and R De Gryse	29	Recapture of secondary electrons by the target in a DC planar magnetron discharge
G Danev, E Spassova, J Assa, I Karamancheva, A Paskaleva, K Popova and J Ihlemann	37	Properties of vacuum-deposited polyimide films
T Hino, S Mustofa, M Nishida and T Araki	47	Reduction of droplet of tantalum oxide using double slit in pulsed laser deposition
T Morita, S Takahashi, H Asama and T Niino	53	Rotational feedthrough using an ultrasonic motor and its performance in ultra high vacuum conditions
S-W Kim, H-S Park and H-J Kim	59	100 kW steam plasma process for treatment of PCBs (polychlorinated biphenyls) waste
M Dhayal, D Forder, R D Short and J W Bradley	67	Electron temperature control in low-pressure plasmas using a two-mesh-separation technique

Volume 70 Numbers 2–3

L Michalak, D Mączka and J Żuk	73	Editorial
F F Komarov, P I Gaiduk, L A Vlasukova, A J Didyk and V N Yuvchenko	75	Track formation in germanium crystals irradiated with superhighenergy ions
B Jaroszewicz, T Budzyński, A Panas, A Kociubinski, W Słysz, W Jung, R Jakieła, A Barcz, J Marczewski and P Grabiec	81	High-quality p–n junction fabrication by ion implantation using the LPCVD amorphous silicon films
J Wilk and Z W Kowalski	87	Titanium surface after neutralized ion beam irradiation

Z Werner, J Piekoszewski, R Grötzschel, E Richter and W Szymczyk	**93**	Resistance to high-temperature oxidation in B+Si implanted TiN coatings on steel
R Jakieła and A Barcz	**97**	Diffusion and activation of Si implanted into GaAs
G Gawlik, J Jagielski and B Piątkowski	**103**	GaAs on Si: towards a low-temperature "smart-cut" technology
D Krupa, J Baszkiewicz, J W Sobczak, A Biliński, A Barcz and B Rajchel	**109**	Influence of anodic oxidation on the bioactivity and corrosion resistance of phosphorus-ion implanted titanium
W Wierzchowski, K Wieteska, W Graeff, A Turos and R Grötzschel	**115**	X-Ray studies of $Al_xGA_{1-x}As$ Implanted with 1.5 MeV As ions
A Gentils, L Thomé, J Jagielski, S E Enescu, F Garrido, M Beauvy and G Blaise	**123**	High temperature behaviour of fission product analogues implanted into nuclear ceramics
R E Hurley and H S Gamble	**131**	Thin film sputtered silicon for silicon wafer bonding applications
A F Komarov, F F Komarov, A M Mironov, N N Nikiforenko, D Mączka and A F Kamyshan	**141**	Formation of C_xN_y films by high dose nitrogen implantation in the layered structures
J Jagielski, A Piatkowska, P Aubert, C Legrand-Buscema, C L Paven, G Gawlik, J Piekoszewski and Z Werner	**147**	Effects of high dose nitrogen implantation into aluminum
E Tishkovsky, K Feklistov, A Taskin and M Zatolokin	**153**	Influence of amorphization–recrystallization processes on distribution of selenium and oxygen atoms implanted in silicon
W Słówko	**157**	Electron signal acquisition in HPSEM
J Baszkiewicz, D Krupa, J A Kozubowski, B Rajchel, M Mitura, A Barcz, A Ślósarczyk, Z Paszkiewicz and Z Puff	**163**	Influence of the Ca- and P-enriched oxide layers produced on titanium and the Ti6Al4V alloy by the IBAD method upon the corrosion resistance of these materials
D I Tetelbaum, A Yu Azov, E V Kuril'chik, V Ya Bayankin, F Z Gilmutdinov and Yu A Mendeleva	**169**	The long-range influence of the ion and photon irradiation on the mechanical properties and on the composition of the permalloy-79
R Fedaruk, C Stelmach, D Yearchuck, P Zhukovski, J Partyka and P Węgierek	**175**	High-spin paramagnetic centers of irradiated elemental semiconductors
V V Uglova, V M Anishchik, Y Pauleau, A K Kuleshov, F Thièry, J Pelletier, S N Dub and D P Rusalsky	**181**	Relations between deposition conditions, microstructure and mechanical properties of amorphous carbon-metal films
M Dudek, S Fouvry, B Wendler, P Kapsa and T Liskiewicz	**187**	The effect of diffusion treatments in a glow-discharge plasma in $Ar+O_2$ atmosphere on friction and wear of Ti–6Al–4V alloy
F P Korshunov, N E Zhdanovich, I G Marchenko, V I Karas and V T Troschinskii	**193**	Study of the recombination properties of thermostable radiation defects in p–n structures manufactured in high resistivity neutron transmutation-doped silicon
F P Korshunov, Y V Bogatyrev, S B Lastovsky, V I Kulgachev, L P Anufriev, I I Rubtsevich and N F Golubev	**197**	Investigation of radiation-induced defects in the electron irradiated power transistor structures

A Turos, J Jagielski, A Piątkowska, D Bieliński, L Ślusarski and N K Madi	**201**	Ion beam modification of surface properties of polyethylene
S Podsiadło, T Szyszko, G Warso, A Turos, R Ratajczak, A Kowalczyk, W Gębicki, I Strzałkowski, D Grambole and F Hermann	**207**	Determination of hydrogen in GaMnN and GaMnMgN by nuclear reaction analysis
F F Komarov, A A Kamarou, P Żukowski, Cz Karwat, J Sielanko, Cz M Kozak and K Kiszczak	**215**	Ion beam assisted deposition of metal layers using a novel one beam system
Cz Karwat, F F Komarov, Cz Kozak, M Łozak, F Romaniuk and P Żukowski	**221**	Electrical and mechanical properties of surface layers deposited on copper by the novel IBAD method
M Al-Ali, N K Madi, N J Al Thani, M El-Muraikhi and A Turos	**227**	Mechanical and thermal properties of gamma-ray irradiated polyethylene blends
E Czerwosz, P Dłużewski, M Kozłowski, R Nowakowski and T Stacewicz	**237**	Photoelectric work function determination for the nanostructural carbonaceous films
T Pieńkos, L Gładyszewski, A Prószyński, D Chocyk, G Gładyszewski, F Martin, C Jaouen, M Drouet and B Lamongie	**243**	Stress development during thin film growth and its modification under ion irradiation
A Szczęsny, P Śniecikowski, J Szmidt and A Werbowy	**249**	Reactive ion etching of novel materials—GaN and SiC
G Przybylski, J Martan and Z W Kowalski	**255**	Fractal analysis of ion-sputtered stainless steel surface
Z Werner, J Stanisławski, J Piekoszewski, E A Levashov and W Szymczyk	**263**	New types of multi-component hard coatings deposited by ARC PVD on steel pre-treated by pulsed plasma beams
V M Anishchik, V V Uglov, V V Astashynski, V M Astashynski, S I Ananin, E A Kostyukevich, A M Kuzmitski, N T Kvasov, A L Danilyuk and I N Rumianceva	**269**	Compressive plasma flows interaction with steel surface: structure and mechanical properties of modified layer
Z Wroński, J Sielanko and J Hereć	**275**	Ti and Fe cathode sputtering by the glow discharge plasma
B Sartowska, J Piekoszewski, L Waliś, M Kopcewicz, Z Werner, J Stanisławski, J Kalinowska and F Prokert	**285**	Phase changes in steels irradiated with intense pulsed plasma beams
J Baranowska, K Szczeciński and M Wysiecki	**293**	Growth of nitrided layer after cathode sputtering
W Czarczyński, B Dobrzański, Z Znamirowski and J Kozłowski	**299**	Field emission from sintered $CrSi_2$
M Rabiński and K Zdunek	**303**	Snow plow model of IPD discharge
J Piekoszewski, A Krajewski, F Prokert, J Senkara, J Stanisławski, L Waliś, Z Werner and W Włosiński	**307**	Brazing of alumina ceramics modified by pulsed plasma beams combined with arc PVD treatment

D Machajdík, A P Kobzev, K Fröhlich and V Cambel	**313**	RBS and ERD study of epitaxial RuO_2 films deposited on different single crystal substrates
A Grigonis, R Knizikevičius, Ž Rutkūnienė and D Tribandis	**319**	Formation of polymeric layer during silicon etching in CF_2Cl_2 plasma
R B Beck, M Giedz, A Wojtkiewicz, A Kudła and A Jakubowski	**323**	PECVD formation of ultrathin silicon nitride layers for CMOS technology
V I Bendikov, A G Guglya, I G Marchenko, D G Malykhin and I M Neklyudov	**331**	Mechanisms of forming the Cr–N composite in the unsteady-state stage of ion beam-assisted deposition process
Z Wroński	**339**	Light emission from the cathode zone of DC glow discharge
W Oleszkiewicz and P Romiszowski	**347**	Characteristics of surface and film morphology in the IBAD deposition process: a Monte Carlo simulation study
A Guglya, V Drakin, A Lymar and N Stervoedov	**353**	High-current and broad-beam ion implanter
M Moneta and J Czerbniak	**359**	Energy loss effective charge for slow ions in electron gas
R Hellborg, M Faarinen, M Kiisk, C E Magnusson, P Persson, G Skog and K Stenström	**365**	Accelerator mass spectrometry—an overview
K Bederski	**373**	A high-pressure mass spectrometric study of ion–molecule reactions of Ar^+ with C_3H_6
J Sielanko, J Filiks and J Hereć	**381**	The sputtering of light target material during implantation of heavy ions
P Konarski, I Iwanejko and M Ćwil	**385**	Core–shell morphology of welding fume micro- and nanoparticles
L Wójcik and A Markowski	**391**	High pressure mass spectrometric study of ion/molecule reactions in the carbon dioxide–methane mixtures
Z Znamirowski, W Czarczynski, L Pawlowski and A Le Maguer	**397**	Field electron emission from laser the engraved surface
S Ptasińska, J Dąbek and L Michalak	**403**	Formation of water dimers in expanding air flows
P Budzynski, P Tarkowski, P Żukowski, K Kiszczak and W Kasietczuk	**411**	Influence of nitrogen ion beam assisted deposition of Cr on tribological properties of tool steel NW1
P Budzynski, A A Youssef and B Kamienska	**417**	Influence of nitrogen and titanium implantation on the tribological properties of steel
M Rubel, P Wienhold and D Hildebrandt	**423**	Ion beam analysis methods in the studies of plasma facing materials in controlled fusion devices
A Pelc, W Sailer, P Scheier, N J Mason, E Illenberger and T D Märk	**429**	Electron attachment to simple organic acids
T Pisarkiewicz and H Jankowski	**435**	Vacuum selenization of metallic multilayers for CIS solar cells
S Ptasińska, A Bajuk and L Michalak	**439**	Influence of potassium chloride on the MALDI detection process
J Meldizon, A Drozdziel, A Latuszyński, S Prucnal, K Pyszniak and D Mączka	**447**	An ion source for solid elements with mechanical sputtering
A Latuszyński, A Droždziel, K Pyszniak, J Dupak, D Mączka and J Meldizon	**451**	Plasma ion source with hollow cathode

J Romanek, A P Kobzev, M Kulik, T Tsvetkova and J Żuk **457** RBS and optical studies of ion-implanted amorphous silicon carbide layers

T Tsvetkova, O Angelov, M Sendova-Vassileva, D Dimova-Malinovska, L Bischoff, G J Adriaenssens, W Grudzinski and J Zuk **467** Structural and optical properties modification of a-SiC:H by Ga^+ ion implantation

T Tsvetkova, S Balabanov, E Skordeva, S Kitova, J Sielanko, D Mączka and J Zuk **471** Ion implantation induced surface morphology changes in thin As_3Se_2 films

Volume 70 Number 4

A A Lozovan **477** Treatment of inner surfaces of tubes by accelerated Cu and Mo ions during pulsed laser evaporation

E Morales-Sánchez, E Prokhorov, J González-Hernández, Yu Vorobiev, J Horta Rangel and S Kostylev **483** Effects of contacts on the electrical characterization of amorphous chalcogenide alloys

H Qiu, Y Tian and M Hashimoto **493** Evolution of interface diffusion and structure of Ni films sputter-deposited on Si(0 0 1)

R-J Zhan, X Wen, X Zhu and A zhao **499** Adjustment of electron temperature in ECR microwave plasma

I Kholodkov, H Biederman, D Slavínská, A Choukourov and M Trchova **505** Plasma polymers prepared by RF sputtering of polyethylene

M Sridharan, Sa K Narayandass, D Mangalaraj and H C Lee **511** Studies on polycrystalline $Cd_{0.96}Zn_{0.04}Te$ thin films prepared by vacuum evaporation

V Nemanič, M Žumer and B Zajec **523** The influence of a hot cathode vacuum gauge on the residual gas composition

D Li and K Jousten **531** Comparison of some metrological characteristics of hot and cold cathode ionisation gauges

R K Roy, S Gupta, B Deb and A K Pal **543** Electron field emission properties of electro-deposited diamond-like carbon coatings

E Spassova **551** Vacuum deposited polyimide thin films

D R Sharma **563** Pressure drop during measurements in a liquid displacement gas flowmeter of improved design
